# Getting the mysql driver into Eclipse

- ## We need to get the .jar file to where Eclipse will find it
  - ### Add it to the Java "Class Path"
   - Adding it varies by application

Getting the mysql driver into Eclipse

- **Select the libraries tab**

Getting the mysql driver into Eclipse

- **Select to add a .jar file**

Getting the mysql driver into Eclipse

- Find the mysql .jar file that you downloaded before the lab and add it.

- Your code should now be able to use the database driver.
